Push Notifications

The Push Notifications feature is provided through **Urban Airship**. Here are the steps to enable push notifications in your app:

1/2

- 1. Download the ViziApps certificate for Urban Airship by clicking the **Download Certificate** button in the ViziApps Studio dialog for Push Notifications. You will need this certificate in step 4. ◄
- 2. Signup to use Urban Airship: https://go.urbanairship.com/accounts/register/
- 3. Create your Urban Airship App to setup Push messages for Development.
- 4. In your Urban Airship App under Settings/Services , configure your Apple Push Notification Service by entering the iOS APNS Password which is "ViziApps1" and uploading the APNS certificate from the ViziApps Studio download in the dialog box.

É Apns	Apple Push Notification Service (APNS) Apple's service for notifications on iOS devices.
	Certificate password
	Certificate Browse No file selected.
	Save or cancel remove this service

5. In your Urban Airship App under Settings/Services , configure your Google Cloud Messaging by entering the Google Api Key from the Studio dialog box and enter "com.viziapps.viziapps" for the Package name.

GCM	Google Cloud Messaging (GCM) Google's service for notifications on Android devices.
	Api key AlzaSyABHEtJzR1DxTkQOQXroQNNatfLONFqQNg

AIZaSYADITEGZKTDATKQOQATO	QNNatiEONFQQNg	
Package		
com.viziapps.viziapps		
Save or cancel	remove this service	

6. In Urban Airship Settings/API Keys, copy the App Key and Secret and paste them in to the ViziApps Development App Key and Development App Secret in the Studio dialog box.

PI Keys for	ViziApps
n order for your a authenticate it to	app to communicate with the Urban Airship API it must use a key and secret combination that your Urban Airship app setup. For more information read about App Keys & Secrets.
App Key Urban Airship g	enerated string identifying the app setup. Used in the application bundle.
App Secret	enerated string identifying the app setup secret. Used in the application bundle.

- 7. Select a Push Notification option in the ViziApps dialog box, for the response on your device,
- Open your app and popup a website with the link in the 'url' key of the notification message. For this
 option, when you send a notification from Urban Airship add the key 'url' and url value and your app
 will popup the website page for that url.
- Open your app and call your function with the notification JSON data. For this option your app will open and call your javascript function with the notification data in a JSON type.
- 8. Save your settings in the dialog box.
- 9. Run your test app in the ViziApps app on your device and send a Push Message from your Urban Airship Development App.
- 10. When you are ready to publish your ViziApps app, in the Urban Airship Settings/API Keys, of your Urban Airship production App, copy the App Key and Secret and paste them in to the Production App Key and Production App Secret in the ViziApps dialog box.
